Turvo Driver

Simplify Collaboration for More Business and Bigger Profits

Gain 100% Real-Time Visibility into Driver Progress, Eliminate Check-in Calls, Speed Payments, and Free-Up Time to Build Your Business with Streamlined Efficiency

Phone calls, dropped signals, pads and paper, wasted time. The "old school" method of coordinating driver, broker-carrier and shipper communications can put strain and stress on relationships and whittle down profitability fast. In addition, coordinating labor at the receiving location around such spotty communications often ends up in valuable personnel standing around with nothing to do. Once a driver arrives, the paperwork headaches begin. Late submissions, missed fees and incorrect invoices can delay payments, while factoring services can further shrink margins.

Fortunately, it doesn't have to be this way. Technology accessible to everyone in the supply chain can now harmonize the entire operation. Imagine linking drivers to shippers, 3PLs, and brokers in real-time for a more coordinated pick-up-to-delivery experience. Think of the efficiencies gained by automating the paper trail using a smartphone.

The time has come to step out of those old routines and into the Turvo Driver app – out-of-the-box telematics communications for streamlined coordination among shipping partners.
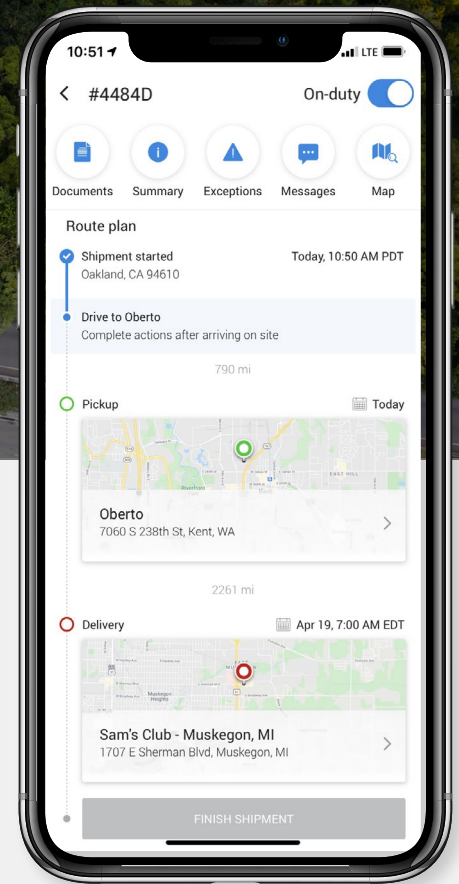

Sync Up, Power Up, Level Up with Turvo Driver

The Turvo Driver app helps carriers grow revenue and profits by streamlining operations and providing outstanding customer experiences. As a cloud-based mobile application, Turvo Driver can be downloaded onto any iOS or Android mobile device and configured in minutes. Simply sign-up, enable location settings, view assignments and get on the road. It's as easy as that. From there, brokers or carriers with Turvo tenant accounts can post availabilities, manage bids, assign drivers and track shipments, while drivers check in once and let Turvo Driver manage the rest.

Over 76,000 drivers have downloaded the Turvo Driver app.

Turvo Driver *at a glance*

Easy to Use: Simple, intuitive phone app provides end-to-end, real-time visibility of shipments.

Precise Tracking: GPS, cell tower and WiFi technology automatically track driver progress.

Accurate ETAs: Ping rates increase as loads approach, alerting receiving teams of exact arrival.

Instant Updates: Digital confirmations, receipts, proofs of delivery and invoices send out instantly.

Fast Payment: Same-day payment is secured directly in most cases.

Manage Offers: Automated load board post loads and availabilities, managing bids and assignments.

Integrated Solution: Natively connected with Turvo's online suite of logistics solutions and user network.

Gain Efficiency, Agility and a Better Customer Experience with Turvo Driver App

Turvo Driver enables the point-to-point, real-time visibility you need to zero-in on exact arrival times and better manage customer expectations. When shipments arrive as predicted, dwell times and detention fees drop. Resource planning improves. Check-in calls go away, and more gets done in a day. Turvo Driver's automated reporting helps ensure that every accessorial charge is accounted for and every invoice is promptly submitted, speeding final payment for improved cash flow and a healthier bottom line.

Run your shipments the smart way with Turvo Driver App:

When a shipment is assigned:
Your driver gets a text link to view the shipment, and the app begins tracking as soon as the driver taps "Start Shipment."

A

At the origin site:
The driver taps "Check In" to validate and "Pick Up" to inspect the items.

B

At the destination site:
1. The driver taps "Check In" again, followed by "Deliver."

2. Using the device camera, the driver uploads the POD and iniates payment.

3. Once the shipment is unloaded, the driver taps "Finish Shipment" to end the route.

In addition, as part of the Turvo Collaboration Cloud, Turvo Driver offers access to Turvo's holistic, collaborative logistics solution that puts mission-critical data and business insights at your fingertips. There's no additional hardware, software or specialized infrastructure to consider. Just download the app and go with Turvo.

Give Users More of What They Want with Turvo Driver App

Today's customers expect great experiences, and the Turvo Driver App delivers. Incorporating the best in mobile device technology with Turvo's cloud-based global network, this lightweight solution effectively brings drivers, carriers, 3PLs, and shippers together for a more productive, seamless load management, shipping and delivery experience.

"All stakeholders up and down the supply chain gain access to the shipment to track container status, view photos of the transload, and have 100% real-time visibility of the driver's progress across the country."

Brian Kempisty
Founder
Port X Logistics

"Turvo has given us the ability to grow revenue by 30% with two-thirds less people reducing operating costs by 60%. The Turvo Driver App has been a complete game-changer in how we connect with our drivers and carriers, enabling us to do more with less for greater ROI."
